Introduction of Climbing Helmet

(Before using this product please read the instruction carefully)

Product Description, Features and Usage

1 Description: The climbing helmet is of fashionable design with brightness color, it's light, ventilated and durable use, thus to be an essential protective equipment for outdoor sports. It plays effective role for head when something falls overhead.

2 Features: The ergonomically design fits any head figure. Durable shell contains several air flows as well as foam makes a buffer layer. When being struck, it would relief impact force and reduce the damage on persons greatly.

Fit buckle at the back could adjust to suit different figure, make sure helmet places on the middle. High strength nylon chin strap avoids helmet falling in height work, its breaking strength is 50daN. There is a buckle to place headlamp. (Fig. 1), also users can attach rubber stickers on helmet (of personality or reflection of light on dark area). This product could be used in low heat or severe environment.

3 Usage: climbing, ice climbing, caving, river-trekking, mountaineering, etc.

Using guide

1 Wearing method: Put on the helmet, fasten snap chin buckle (Fig. 2), adjust chin webbing. Adjustment for fit buckle at the back: clockwise rotate the button means fasten; counterclockwise rotation means loosen (Fig. 3).

2 Fit system: The helmet should dial in your fit and comfort (Fig. 4). It cannot rock after you wearing the helmet. (Fig. 5, 6) If not wearing a helmet well, it cannot play an effective protection for head.
